

Pet All in Guadalajara Mexico

Pet All is currently showing at the Guadalajara Mexico Plastics Exhibition, 28-30th of March 2017.

Pet All has had excellent success in the Mexico market, especially with their most recent Can Mold Hybrid IBM Machinery. The Can Mold Hybrid IBM 88 Ton is being used by clients alongside their standard Hydraulic 88 Ton and clients are reporting that the Hybrid is faster, cleaner, less noise and uses less electricity than their standard 88 Ton Hydraulic Machines.
